

Barrington Packaging Systems Group

Vertical Form, Fill, Seal Vertical Baggers

Barrington Packaging Systems Group offers a full range of VFFS Baggers. Our baggers work with all types of filling mechanisms and a wide range of film structures to package powders, granules, chips, liquids, and small pieces.

All machines are available in stainless steel and with USDA washdown capability. We also offer all types of conveyers, giving our customers the opportunity to fully automate their packaging processes.

Filling Mechanisms

Auger Filler
for Powders

Rotary Pump
for Liquids

Multi-Head
Scales for
Granules,
Chips, Small
Pieces.
