Barrington Packaging Systems Group

Integrating Packaging Equipment, Materials, Production Services and Marketing Support

BPSG K-Cup Machines

Now you can be part of the biggest trend in the coffee industry - K-Cups. K-Cup brewers are in over 30 million households and offices in the US. Many retailers are devoting as much shelf space to K-cups as they do to canned and bagged coffee. This growth is expected to continue, and Barrington can help you capitalize on it.

Barrington offers four automatic K-Cup machines, meeting your needs from small runs to large scale production. Each is equipped with brand name components - PLC and touch screen control. We also can supply your K-cups and foil seals, making Barrington your "one stop shopping" source for K-Cup profits.

- Automatically deposits cups in each lane.
- Inserts filter and presses in place
- Fills cups with desired amount of coffee (precision auger filling).
- Compresses coffee powder in cups.
- Nitrogen flushes before first sealing.
- Sterilizes cup with Ultraviolet
- Deposits foil seals on each cup.
- Seals cup twice.
- Drops down finished cups.
- Optional conveyer moves cups away from machine.

Options

- All Stainless Steel
- Plexiglass Cover
- No Cup - No Fill
- Takeaway Conveyer
