Barrington Packaging Systems Group

Integrating Packaging Equipment, Materials, Production Services and Marketing Support

Single Serve Coffee Machinery for the UpShot™ Format

Now you can be part of the biggest trend in the coffee industry - Single Serve. Single Serve brewers by Keruig and others are in over 30 million households and offices in the US. Many retailers are devoting as much shelf space to Single Serve as they do to canned and bagged coffee combined. This growth is expected to continue, and Barrington can help you capitalize on it.

Barrington offers four automatic Single Serve machines, meeting your needs from small runs to larger scale production. Machines are available for producing with the UpShot™ format and all other single serve platforms. Each is equipped with brand name components - PLC and touch screen control. Barrington can also produce a bagging or cartoning "end of line" system to make your Single Serve production fully automated.

We also can supply your cups, sealing film, and outer packaging, making Barrington your "one stop shopping" source for Single Serve profits.

The Barrington Warranty covers parts and labor for two full years.

Machine Operation

- Automatically deposits cups in each lane.
- Fills cups with desired amount of coffee (precision auger filling).
- Compresses coffee powder in cups..
- Sterilizes cup with Ultraviolet.
- Seals cup with roll stock film.
- Drops down finished cups.

Options

- All Stainless Steel
- Plexiglass Cover
- No Cup - No Fill
- Takeaway Conveyer
- Bagging or Cartoning system for finished cups.
