BPS-T-400R Random Case Sealer

The Barrington
Warranty covers all
parts and labor for a
full two-year period.

The BPS T-400R Random Case Sealer is a top and side belt drive sealer that automatically adjusts to the size of the carton within the parameters. Air-driven cylinders automatically adjust to the height and width of each carton.

Standard features include a roller top in feed and exit table, locking casters and top squeezers to keep your case square as it enters the taping area.

All of these standard features, and the affordable price point, make the BPS T400R Random Case Sealer an excellent labor- saving value.
